

# A HOLE IN ONE

Palm Beach Illustrated Magazine - December 2003

The PBI staff is always on the lookout for new ways to make golf fun - and we have found one in the O Putter, an innovative club produced by Delray Beach - based golf equipment company. The heel-toe weighted putter has a comfortable flat alignment, helping the golfer to keep the putter on line. And its distinctive ball striking - sound gives immediate sweet-spot feedback. Best of all, the hole in the putter's base and the slot in its back enable the golfer to retrieve the ball from the cup and pick up clubs or the flagstick without bending. Now, if they can only come up with a way to find the ball in the woods.
